

**I'VE HAD  
ENOUGH.  
I'M GOING  
TO VOTE.**

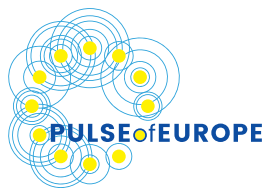

# Defend the heart of Europe – with your vote!

Admittedly, when faced with the many problems of our time, sometimes you'd rather bury your head in the sand than deal with the news and politics. Climate, pandemic, wars, migration, shortage of skilled labour, inflation... These are all huge challenges that can only be solved with foresight, a willingness to cooperate and perseverance. Especially now, we must not stop working together. We need the strength and cohesion of all European countries now more than ever. If we abandon the field to nationalist forces, we will deprive ourselves of the best chance we have: a strong, united Europe that stands up for our fundamental values and secures our future.

Don't choose  
resignation.  
**Choose  
opportunity.**
